Dapsone tablet

What is this medicine?

DAPSONE is an anti-infective medication. Dapsone is used to treat dermatitis herpetiformis (a skin condition) and leprosy. Dapsone topical may also be used for purposes not listed in this medication guide.

What should I tell my health care providers before I take this medicine?

You should not use dapsone if you are allergic to it.

To make sure dapsone is safe for you, tell your doctor if you have:

- a genetic enzyme deficiency called glucose-6-phosphate dehydrogenase (G6PD) deficiency;
- methemoglobin reductase deficiency (hemoglobin M);
- liver disease;
- heart disease; or
- lung disease.

FDA pregnancy category C. It is not known whether dapsone will harm an unborn baby. Tell your doctor if you are pregnant or plan to become pregnant while using this medication.

Dapsone can pass into breast milk and may harm a nursing baby. You should not breast-feed while using this medicine.

How should I use this medicine?

Follow all directions on your prescription label. Your doctor may occasionally change your dose to make sure you get the best results. Do not take this medicine in larger or smaller amounts or for longer than recommended.

Dapsone may be only part of a complete program of treatment that may also include a special diet. Follow the diet plan created for you by your doctor or nutrition counselor. Get familiar with the list of foods you must avoid to help control your condition.

Your doctor will need to check your progress while you are using dapsone.

What if I miss a dose?

Take the missed dose as soon as you remember. Skip the missed dose if
