Regina Carter

OBJECTIVE

As a strong software engineer with diverse SDLC experiences in most all phases, my recent experience includes a vast amount of quality assurance and configuration management. I have performed all types of testing, both on front end and back end systems and diverse environments. I have also developed and enforced processes; I would consider testing as my greatest interest and asset.

EXPERIENCE

Quality Assurance Engineer

Scottrade Corporation - Westminster, CO
April-2011 - December-2017

Quality assurance testing on varied compliance reporting and trading activity. Full integration testing included for front end and back end systems.

QA Team Lead role on many major projects with focus on compliance reporting. Full documentation created for test plans, test cases, and results. Mentoring of new hire team members.

Various platforms used for interface testing; back office databases tested with DB2 SQL to front end GUIs and trading applications; validation of XML data via i-series Navigator and UltraEdit for XML.

Senior QA Engineer

Qwest Communications - Denver, CO
July-1999 - February-2010

Execution of all testing between mainframe sources and mid-tier processing to front end applications. Specialized in XML and ETL Informatica for data warehouses. Created test scripts and test plans for integrated testing across all environments and platforms.

Tested Unix/Linux load scripts for data warehouses and performed loads to Oracle databases with follow-up queries. Tested source data, XML, ETL Informatica, SQL, and HTML with various tools like Toad, SQL Server 2005, and Ultra-Edit for XML.

 Performed all release deployments for warehouse environments. This included all configuration management work for ETL deployments.

SKILLS

SQL , Oracle , Informatica , Unix / Linux / Scripting , Big Data / Warehousing , Development / Coding / COBOL, defect management tools, Tech Writing / MS Word / Framemaker , Configuration Management tools , Release Management tools , Team Lead Roles and project completions, Excel spreadsheets for automated testing input and Microsoft Word use for test documents; previous experience on large payroll systems.

CERTIFICATIONS & COURSES

- Significant recent training in Agile, Selenium, Java, Eclipse, Hadoop and other new tools and technologies. Experience in all phases of the SDLC with Waterfall, Iterative, and Agile methodologies.
- Numerous technical and soft skill training courses. Details upon request.
