Respected and trusted for management skills, confidentiality, ethics and compliances, and continuous improvement.

Administrative Skills:

- Procurement
- Estimating
- Mfg. Engineering
- Customer Service
- Interviewing
- Purchasing
- Safety
- Bill of Materials
- Master production scheduling & Employees Work Schedule
- Sales Inside & Outside
- Freight Claims (RMA)
- Training Personnel in Various Departments
- Tool design
- EHS
- Planning
- Negotiating contracts
- Read Blue Prints and Milars
- 10 key by touch
- Reports of all types (financial, status, productivity reviews)
- Facility flow layout

Computer Skills:

- Microsoft office (All)
- UPS World
- Liberty
- Unipoint
- CATIA
- AS400
- FedEx
- Vantage 8.0 (Epicor)
- QuickBooks
- Autovue
- SAP
- Job Boss
- RF Scanners (All types)
- Master Cam
- Infor XA (ERP)
- Microsoft Dynamics AX (ERP)

Warehouse Experience:

- Operations
- Shipping & receiving functions (ALL)
- Forklift 20yrs (All)
- Import/Export customs.
- Elec. Pallet jack
- Packaging
- RF Scanners
- Order fulfillment
- Inventory control
- RMA

Machines & Tools:

- Stretch Press
- Drill Press
- Brake Press
- Saw (all types)
- Precision Tools
- Pneumatic tools
- Leveler (CTL)
- Slitter
- Check & Straight
- Grinders (all types)
- CNC 3,4,5 axis machines
- Shear HD
- Roll Form
- HD Overhead Cranes
- Install/Disassemble Machines
- Waterjet

Certifications:

- Project Management (PMP)
- AS9100
- Hardness & Conductivity
- Sigma Six Courses
- Age oven
- QC

Education:

Cal State San Bernardino– Bachelor’s Degree in Business
Cal State Dominguez Hills - Project Management (PMP)
Milor High School - Diploma

Professional Experience:

Carrier Mausoleums Construction U.S.A Operations

1/4/2018 – Current

943 Seaboard Court
Upland, Ca 91786

Operations/Production Manager – My current roles here at CMC are Assessment of human resources requirements to ensure smooth running of production operations, leading of weekly production meetings, update production schedules, project cost analysis, weekly Payroll, providing training to new employees, enforcing company policies and regulations and ensuring that all employees respect them. Coordination of health and safety training for shop workers and ensuring health and safety at work. Source all new vendors here in the U.S. for –material, rubber, anodize company, machine shops, etc....Coordination of production delivery and installation as well as workforce, material and equipment requirements for production. Ensure production projects launch, review drawings and complete production control duties. Purchase all necessary raw material: i.e. aluminum (extrusions and sheets), neoprene, temporary rosettes, sealant, aluminum wood for crates and any product needed for manufacturing activities and shipping/transportation for completed projects. Continue to improve our manufacturing and production processes to attain acceptable delivery dates and to cover production peaks. Development of new ideas to continuously improve manufacturing leading and controlling while working on the different workstations (extrusion, cutting, piercing, assembly, shear, punch, saw, etc.). Establishing effective implementation of projects production, reviewing of drawings and clarifying any uncertainties. Tracking stock inventory (extrusions, sheets and accessories – adhesive, gaskets, etc.). Coordinating missing material orders for production and shipment, inventory update, weekly recording of production count, ensuring A+ quality control of product. Ensuring general maintenance of building, workshop and equipment as well as preparing maintenance records. Providing information to Project Managers about products that channel through the workshop.

Votaw Precision Technologies

4/19/2017- 12/23/2017

13153 Lakeland Rd
Santa Fe Springs, Ca 90670

Project Manager/Mfg. Engineer/Planner/Operations Mgr./Inventory control Mgr. - Responsible for scheduling production (machine shop 3,4,5 axis/VTL, weld shop, paint, NDT, and assembly), maintaining constant movement of projects, analyzing, developing, and updating detailed plans to support delivering a quality product on-time within budget and with great customer support. Always keep the customer apprised of the progress of the project, develop program milestones, detailed project schedules, status and tracking matrixes, risk assessments and contingency plans as well as reviewing customer requirements within technical compliances. Identify long lead materials and report progress to customer. Generate product flow sequencing (Manufacturing Methods). Identify special process or test inspection requirements. Schedule and manage all shop production to make sure project ships on time. Support customer change orders including updating shop floor routers. Participate in design for manufacturing and assembly meetings of new products. Also responsible for the initial review of product nonconformances and rework instructions when applicable, keeping inventory status current such as bond room, hardware, raw material and CFM.
