## Work Experience

**Labor-Max Staffing Certified Flagger \$11.50/hr-** 06/15/2019 to present, my current position is a flagger. I direct traffic at construction sites as well as maintaining a safe environment for workers and vehicles. I also setup, maintain, and remove temporary work zones including warning signs, traffic cones, and rumble strips according to ATSSA and DOT regulations, load and unload work zone equipment to and from the company vehicle, complete any and all paperwork in a timely manner, wear and maintain proper protective equipment in accordance with company policy. This did require a certification and I am certified until 06/26/2021.

**RGIS \$13.50/hr-** 3/20/19-6/15/19 at RGIS my job was to count and verify the current inventory at various retail locations in Colorado, Wyoming, North and South Dakota. This requires extreme attention to detail when working with hands, professionalism as well as working quickly and efficiently. All of my work for RGIS was performance based and I was scored on each inventory event I was part of. I never got below a 90% accuracy rate. I never disturbed or damaged any product. I left this position due to their hours requirement. All of their work is done before stores open (work must be done before 9am), and those hours are extremely difficult with a small child at home.

**Fred Meyer Deli Worker \$10/hr-** 10/2016-11/2016 and 12/2017 to 8/30/2018, my job was to slice meats and cheeses to order by thickness and weight, follow food safety regulations, maintain and operate deli machinery and arrange platters to specific specifications. It was also my job to regularly organize/rotate stock using FIFO to ensure the safety of our product. My position here required extensive customer interaction (in person and over the phone). I was given an award for my customer service skills a few months into my job at Fred Meyer. I also worked for the Kroger company as a Deli worker at King Soopers in Windsor CO prior to this, the job was the same just in a different location. In late August 2018 my family had to move suddenly and I was not able to keep this job. **Terri 208-535-2520**

**Basic American Foods Drummer \$16.00/hr-** 4/2017-12/2017 In this position I shoveled mashed potatoes into and out of production drums. It was my responsibility to maintain a clean and safe workspace by following the SAFE process set by Basic and all national food safety regulations. This also required operating heavy factory machinery, occasional use of the forklift, and constant vigilance to make sure every batch was made to specifications. I left this job because they would not transfer me to a less physical position, as shoveling potatoes was extremely strenuous. **Factory Number 208-357-3402**

**McDonald's Shift Manager \$12.45/hr-** 1/2016-11/2016 at McDonald's in Windsor CO I was hired on as a crew member and started in the kitchen making food products, cleaning to specifications and following food safety guidelines. I would also handle incoming deliveries of product from our distributors and organize all incoming product while rotating stock as a crew member. Because I performed well as a crew member I was promoted in March 2016 to shift manager. As a shift manager I was in charge of all employees in the store during my time on shift as well as handling any customer complaints or issues that would come up. Being a manager required solving problems in a way that would benefit the store and the customers on every shift and I never failed to make sure everyone came out on top. My other duties as a shift manager including keeping track of breaks for all employees, placing people in positions around the store that suit their abilities, preparing deposits, providing great customer service and doing a waste vs sales calculation to make sure products were being used correctly. I left this job in November 2016 to move to Idaho. **Bri 970-686-2975**

**Wendy's Shift Manager \$10.25/hr-** 9/2013-9/2015 and 11/2017-4/2017 I started at this Wendy's in Idaho Falls ID as a crew member in the service area (drive thru and front lobby). Because of my excellence in service I was trained in operating the grill, making sandwiches and other food preparation positions. My hard work paid off quickly I was promoted in 2014 to a shift manager. As a shift manager my job was to open or close the store, handle money and make sure all money in the store was where it needed to be, supervise all employees on my shifts and assist any customers with their specific needs as well as any food preparation help needed by my crew members. I left this job in 2015 to move to Colorado with my brother. **Robert or Amanda 208-522-5322**
