Fluticasone and Salmeterol inhalation

What is this medicine?

FLUTICASONE; SALMETEROL inhalation is for treating asthma that is not controlled with other asthma medicines or when more than one treatment is necessary. Fluticasone is a corticosteroid which decreases inflammation in the lungs. Salmeterol helps open the airways in the lungs. This medicine is intended for regular use. It will not cure your condition, but when used regularly it can open up your air passages and make
