SUMMARY:

I'm a UCCS graduate in Mechanical Engineering and am currently working with AutoCAD, and looking to extend and grow qualifications, technical abilities and experience. I also am willing to relocate and travel for the position I am pursuing.

QUALIFICATIONS:

- Extensive experience designing equipment in AutoCAD, AutoCAD MEP, and Autodesk Inventor.
- 5 years working in an office environment, achieving goals, and coordinating with co-workers.
- Degree in Mechanical Engineering with minors in Aerospace Engineering and Mathematics.
- Often multitasking, surpassing deadlines, searching for tasks, and learning new tasks.
- Experienced working with electronics, computers.
- Experienced reviewing PDF and Autocad drawings, and checking work.
- Experienced integrating skills with different software, examples such as exporting AutoCAD information to Excel and other formats.

TECHNICAL ABILITIES:

- Testing equipment, and electrical equipment. Such as various electrical devices, university wind tunnel, and university tensile testing machine.
- Personal experience, building, fixing, and setting up computers.
- Microsoft Excel, Power Point, Outlook, and Word.
- Programming in, Excel, Autodesk, Visual Basic and MATLAB.
- Drafting in AutoCAD, AutoCAD MEP and Autodesk Inventor software.

EDUCATION:

- High school diploma from Golden High School, May 2002.
- University Of Colorado at Colorado Springs, May 2008
 - Major: **Bachelor of Science in Mechanical Engineering**
 - 1st Minor: **Aerospace Engineering**
 - 2nd Minor: **Mathematics**

EMPLOYMENT:

Cobb Mechanical: January 2013 - Present

- Supervisor(s): Chris Bowles & Jean Phillips
- Tasks:
 - Timely checking, exporting information, and reviewing drawings for various reasons with BluBeam.
 - Relied on for routing piping and duct in AutoCAD.
 - Creating Autocad Mvpart block based parts from submittals.
 - Creating Autocad Mvpart parametric based parts from submittals.
 - Troubleshooting display, and various issues in drawings.
 - Effectively saving time by converting found parts online from other types of programs to work with Autocad MEP.
 - Creating, organizing, managing parts catalogs.
 - Learning and implementing basic programming in Autocad for smart tags, mvparts etc.
 - Timely dimensioning and annotating drawings.
 - Using engineering education for solving and calculating loads for hangers on pipes.
