SUMMARY

I attended Lewis and Clark Community College in the computer drafting design program with 2 year of college. I plan on continuing to get my associates degree. I have 20 plus years in the manufacturing field. I have worked in many departments including the engineering design department, production where I operated trumpf cnc laser machines producing precision parts for manufacturing companies. I also worked as fork truck and crane operator loading and unloading material and parts. I have Worked in the shipping and receiving department selecting parts for orders and receiving parts from production and shipments and scanning into the proper locations.

OBJECTIVES

My objection is to work for a company and grow learning new skills that will better give me knowledge on the task given to me. I learn new things easily and do them professionally . My goal is to move in a company where I can grow and continue learning from others. Also continue my education to be better for the jobs given to me.

EDUCATION

Lewis and Clark Community College Godfrey ,Illinois

Enrolled :August 1986

Grade: 2 years of college

I got the highest grade point average Industrial Arts Program...Southwestern High School Piasa,Ill. Received the perfect attendance award 4 years of high school. Certificates received are trumpf laser operator/programmer and hawk missile crew member through ratheon while I served in the united states army at Fort Hood, Texas. I have had training in safety procedures and earned several certificates. I have operated fork trucks and was issued driver operator certificates while I was employed. I was a certified hunter assistant instructor for the Illinois Department of Natural Resources teaching hunters safety and procedures about hunting.

EMPLOYMENT HISTORY

January 2013---April 2013: Insurance Agent

Company: American Income Life

Maryville, Illinois

I presented laptop presentations to union members and referrals. Delivering benefits and selling whole and term life insurance policies, filling out all paperwork and applications on computer laptop.

March 1996--January 2011:Laser Operator/Warehouse associate

Company: Robinson Laser

Granite City, Illinois

I operated a trumpf laser system in the production department and did whatever maintenance was needed on a daily basis. I worked as a crane operator, fork truck operator--loading and unloading material and parts on and off the trucks, finishing all paperwork and entered information into the computer system. I worked in the parts department selecting parts for orders, receiving all parts from production and from customers scanning them and placing them into the proper locations and finishing paperwork on computer.

October 1993 -November1995:Laser Operator

Gateway Laser Technology

Alton, Illinois

Worked on CAD/CAM computer system designing drawings for customers, making parts for production. When finished, drawings programmed in CNC code for Amada Laser cutting system. Cut precision parts for different customers; including Cope Plastics, Boeing, and Owens Illinois. Set up laser to do different types of material; steel, stainless steel, aluminum, wood, foam, rubber, and plastic. Changed tech table for whatever material was on order. Shipped and received material whenever needed. Welded parts to finish products to ship out to customers. Also sandblasted and painted parts.

November 1990-June 1993:Hawk missile crewmen/light wheel vehicle mechanic

United States Army

Fort Hood ,Texas

I worked as a hawk missile crewmen with many duties loading and unloading missile assembling before loading on missile launcher.

I did maintenance on all equipment including 60k generator ,radar system and any other equipment when needed .When we were not in the field training I worked in the motor pool as a light wheel vehicle mechanic. Working on 6x6 tandem army trucks, 5 ton trucks ,hummer vehicles and any other equipment doing preventive maintenance installing new parts on all vehicles. I was assigned to be the tool man distributing all tools out of my tool cage to all mechanics. I received the army achievement medal doing beyond what ever task was given to me. I made honor guard while I served too.

March 1990--November 1990: Auto Cad Operator

Company: Bechtel

Wood River, Illinois

I worked as an auto cad computer operator and worked on P&ID piping and instrumentation drawings transferring the drafting drawings onto an auto cad computer system. Worked along with piping engineers, walking the pipe lines transferring any changes onto the auto cad computer system,.

PROFESSIONAL SKILLS

Machine programmer	Advanced
Machine Operator	Advanced
Hand Tool Knowledge	Advanced
Crane Operator	Advanced
Auto Cad Operator	Advanced
Maintenance	Advanced
Fork Truck Operator	Expert
Shipping/Receiving (material)	Advanced

HOBBIES & INTERESTS

I enjoy the outdoors, Gardening, Hunting (Bow and Shotgun), Fishing, and Camping. I enjoy Sports; Baseball, Softball; Golf and Football.

I enjoy working with wood and have built furniture using my own drafting drawings. I also have recently been making deer shed, duck theme, and driftwood lamps, including chandelier made using deer sheds. Have designs using driftwood and barn wood. Recently I created my own business to sell at outdoor events and to sell at the local Farmers/Artist Market.
